

Remote Data Collection for Android Smartphones

Fast, Targeted, Automated, Cost-Effective, Global and Secure.

ModeOne's patented SaaS framework efficiently collects data from Android devices anywhere in the world without the need for a physical collection kit or onsite personnel.

Eliminate traditional challenges with smartphone data acquisition using ModeOne's patented SaaS framework for truly remote, targeted collection and processing.

- **Reluctant Custodians**- Employees are unhappy about giving up their phones for hours or days.
- **Invasive Procedures** - Smartphones store non-relevant, personal data that should be excluded from acquisitions.
- **Disruptive Workflows**- Onsite collections disturb the office environment and reduce productivity.
- **Expensive Extraction** - Data collection that requires travel and onsite technicians is expensive and increases the time-to-facts.
- **Non-Compliant Access**- In many countries, access to private data on smartphones is protected by regulatory agencies.

Data acquisition
for litigation,
compliance, or
investigations

The ModeOne Advantage: Fast, Remote, Targeted, Cost-Effective, Global, and Secure

Collect relevant text and chat messages, call history, contacts and media (photos/videos).

- **Fast** – Same day Android device collections reduce time-to-facts.
- **Accessible** – Truly remote data acquisition delivers global reach.
- **Reassuring** – Custodians do not need to relinquish their devices.
- **Scalable** – Cloud-first design enables unlimited simultaneous acquisitions.
- **Secure** – AWS hosting leverages robust security standards.
- **Affordable** – Predictably lower cost versus that of traditional processes.
- **Compatible** – Simplify uploads by exporting formats to popular eDiscovery platforms (e.g., Relativity, Reveal).
- **Private** – Data targeting excludes personal data from the collection.

JUST 4 SIMPLE STEPS

1

Install ModeOne App

Directly from the ModeOne generated URL.

2

Enter Code Displayed

Join nearby hi-speed Wi-Fi network or consent to use cellular data connection.

3

Target Specific Data

Select only text messages, contacts, calls, or any combination with an optional date filter.

4

Begin Collection

Provide consent to retrieve only specified information for your legal team's review.

Contact ModeOne today at info@modeone.io to efficiently collect relevant data from Android devices, anywhere in the world, in a timely, targeted, cost-predictable and forensically defensible manner.
